RE: Recommendation for Jon Gardner

To Whom It May Concern:

I proudly recommend Jon Gardner to your company and would like to convey my experience with him on his exceptionally professional character and work ethic.

Mr. Gardner helped drive the company's design and development of custom web portals for our clients using Joomla! open source CMS. His graphic design, Joomla! CMS, and web programming skills give Breakaway Group clients professional and highly functional websites to help promote their IT healthcare adoption. He has also shared his audio/video knowledge to produce deliverables for numerous internal and external projects. Jon is a truly talented graphic design and web developer and frequently offers creative solutions to deliver a better experience for clients. He is always very quick to come up with unique ways to deliver projects on time and with superb quality. Jon is also very proficient at inventing new permanent processes to improve efficiencies in the department.

In addition to his impressive graphic and web development skills, Jon is an outstanding team player. He eagerly participates with the other members of the team, sharing his ideas and expertise. He is always ready to jump in anywhere help is needed.

Mr. Gardner's skills and abilities would make an exceptional addition to your company. It was a wonderful experience working together with him and I am especially thankful for his expertise and creativity.

If you would like any more information about Jon, please feel free to contact me at 303-807-3949 or klharrington@me.com.

Sincerely,
Kristen Harrington
Former Learning Technology Manager, The Breakaway Group
